

List of approved sub-processors for the provision of KRONES services

This attachment lists the sub-processors engaged by Krones when providing services to the customer. In the following the sub-processors categories are described briefly. Sub-processors can be assigned to multiple categories.

Entity Types

Hosting

Sub-processors that provide infrastructure services or complete solutions. Customer data and personal data are processed in this context.

Support

Sub-processors that provide support for Krones. Customer data and personal data may be visible when ensuring support.

Contract staff

Sub-processors that provide contract staff. Customer data and personal data may be visible or is required for work.

Subsidiaries

Subsidiaries and affiliates are companies where Krones holds most of the shares. In all such cases, customer data or personal data resides only on systems which are subject to Krones policies and supervision.
